health products

Delivering worldwide

Contraception provided by UNFPA worldwide (2022)

Male condoms	1,090,349,152
Female condoms	7,608,565
Oral contraceptives Monthly cycles of the pill	47,358,430
Intrauterine devices IUD	1,649,410
Injectable contraceptives Doses	50,392,250
Contraceptive implants	8,604,291
Emergency contraceptives	3,597,500
Personal lubricants	159,314,644

13.3 million

unintended pregnancies
pregnancies prevented*

30,800

maternal deaths
were averted*

117,000

new HIV
infections
averted*

3.7 million

unsafe abortions
prevented*

5.1
million

new sexually
transmitted
infections
were averted*

59 million

couple years protection
were provided by UNFPA-
procured contraceptives*

1. Contraceptives. Upcoming opportunities

TENDERS PLANNED FOR 2024

- Non Hormonal IUDs and Post-Partum IUDs
- Male Condoms, Female Condoms and Lubricants including water based and silicone based
- Vasectomy Kits
- Ligation Tubes

2. Medical Supplies. Upcoming opportunities

TENDERS PLANNED FOR 2024

- Interagency Reproductive Health Kits, other medical kits, medicines and medical devices (in process)
- Joint tender with UNICEF for reproductive health medicines
- Anatomical Models
- Basic Emergency Obstetric and Neonatal Care (BEmONC) and Long-Acting Reversible Contraceptives (LARC) Training Kit

Criteria for Selection

- Quality requirements established by QA Team
- Sustainability
- Packaging Requirements
- Price
- Registration of products
- Manufacturing country
- Scope of countries covered under the offer
- Manufacturing lead-time
- Previous performance in similar contracts
- Financial stability
- Numbers of items of the offer

Blanket Purchase Agreements (BPAs)

BPA's are written agreements between UNFPA and a supplier that **covers all the commercial terms applicable to potential orders for repeated purchase of predefined goods or services.**

Includes relevant details of products, pricing, discounts, payment, packing, delivery, applicable general terms and conditions.

Established for a specified period of time - normally 3 years with possibility for 2 years extension.

Raised with a one or with several suppliers - it may contain one or many products or services.

2. GS1 Project Status

2. GS1 Project Status

Introduction:

GS1 standards enables **improves supply chain efficiency, product authenticity and ensure product visibility from manufacturing point to end user(i.e Last Mile Assurance).**

GS1 standards starts with **Manufacturers identifying the product uniquely at different packaging levels included with global identifier such as GTINs and GLNs.**

Product information such as GTIN, Batch/Lot, Expiry Date and Serial Number is **electronically captured with GS1 barcodes such as GS1-128, GS1 datamatrix**

Master data information is shared with **Trading partners using (GDSN) datapool and Transactional event data is shared using (GS1 XML and EPCIS formats) for product identification and Traceability.**

Project Goals

UNFPA interested to identify and deliver all contraceptive commodities to countries with GS1 standard barcodes for traceability and verification which ensure last mile delivery and prevent product diversion.

Understand Manufacturers readiness for adoption of GS1 standards using surveys and discussions.

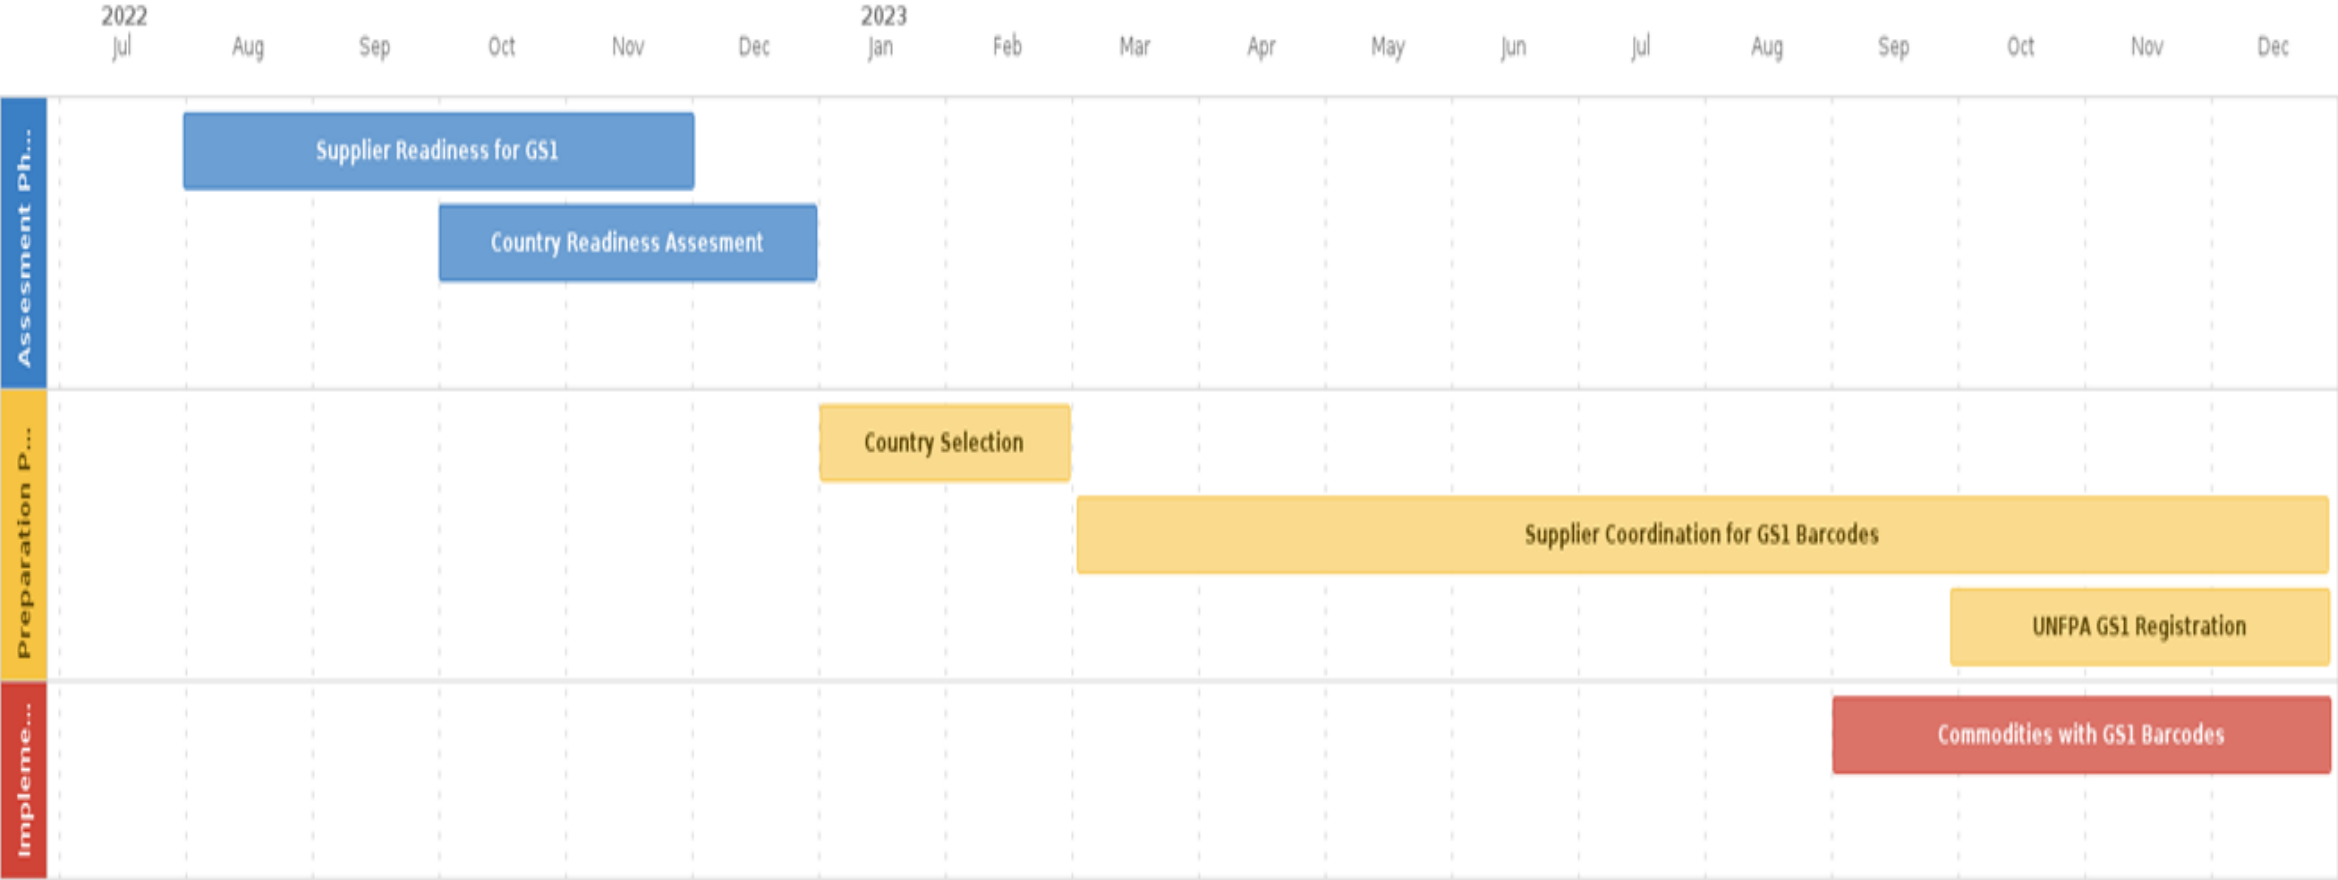

Identify countries and their readiness for GS1 standards adoption.

Participate in GS1 rollout projects at the country level for the contraceptive commodities and ensure that UNFPA products are barcoded as per country regulatory needs.

Prepare future UNFPA contraceptive commodities shipments with GS1 standard barcodes for the selected rollout countries based on their readiness.

Project Phases

Project Phases

Assessment Phase

Supplier Assessment: UNFPA Google survey sheet to assess contraceptive Manufacturers and suppliers readiness for GS1.

Response: 70% responded.

- 85% of contraceptive manufacturers from the responses received have already adopted GS1 standards for product identification and capture of contraceptive commodities at different packaging levels.

Country Assessment: Working closely with other UN agencies and Organizations such as UNICEF/WHO/USAID for collaborating in the countries.

So far Rwanda, Nigeria, Zambia and Malawi are embracing GS1 standards for Traceability and product verification.

Preparatory Phase

UNFPA initiation collaboration with selected group of manufacturers and suppliers, proactively preparing them for GS1 standards adoption.

Plans: Malawi, Nigeria and Zambia in the future

UNFPA SCMU GS1 team working with UNFPA COs to work closely with representative of country FDA and MOH to understand the country regulatory requirements and sharing GS1 product master data information for UNFPA products to country National Product Catalogue Team.

Implementation Phase: Rwanda Pilot Project

Rwanda: Initially planned for October 2023 (2nd tranche) to implement GS1 standardization.

Delayed to Pilot Phase to June 2024 due to change in country priorities.

GS1 master data shared by UNFPA to Rwanda National product team for GS1 implementation

UNFPA will work with contraceptive manufacturers to prepare shipments by Q2-2024 for Zambia and Nigeria.

UNFPA will start coordination with manufacturers to enable GS1 barcodes on Secondary and Tertiary packaging (possibly on primary packaging).

Barcode should enclose GTIN + Batch/Lot + Expiry Data information based on country requirements at Primary and Secondary packaging levels. SSCC (Serial Shipment Container Code) on Tertiary Packaging.

UNFPA planning to get GS1 registration, which will help to communicate electronically in the future with manufacturers and suppliers.

Examples

Sample GS1-128 & Barcode on the secondary packaging(Case/Box)

GS1-Data Matrix on the primary packaging with GTIN,Serial Number,Expiry Data and Batch/Lot Information

Example of a GS1-128 barcode for a logistic unit

3. ERP Implementation Project Status

3. ERP Implementation Status

Enterprise resource planning (ERP) is a software system that helps run the entire business, supporting automation and processes in finance, human resources, supply chain, procurement, and more.

UNFPA ERP project, part of ICT transformation, **strengthens results based management and operational efficiency for stronger and improved program delivery**

ERP Project Objectives

Major objectives of the ERP Project:

1. Supporting management and programme reforms
2. Supporting the fulfillment of the requirements of the UNFPA 2018-2021 Strategic Plan
3. Improving the Agency's monitoring and oversight capabilities
4. Replacing the Agency's legacy
5. Enabling new operating models

Supply Chain Management

SUPPLY CHAIN MANAGEMENT

PROCUREMENT
AND LOGISTICS

Integrated platform from procurement planning to payment

A single vendor database

Introduction of supplier portal

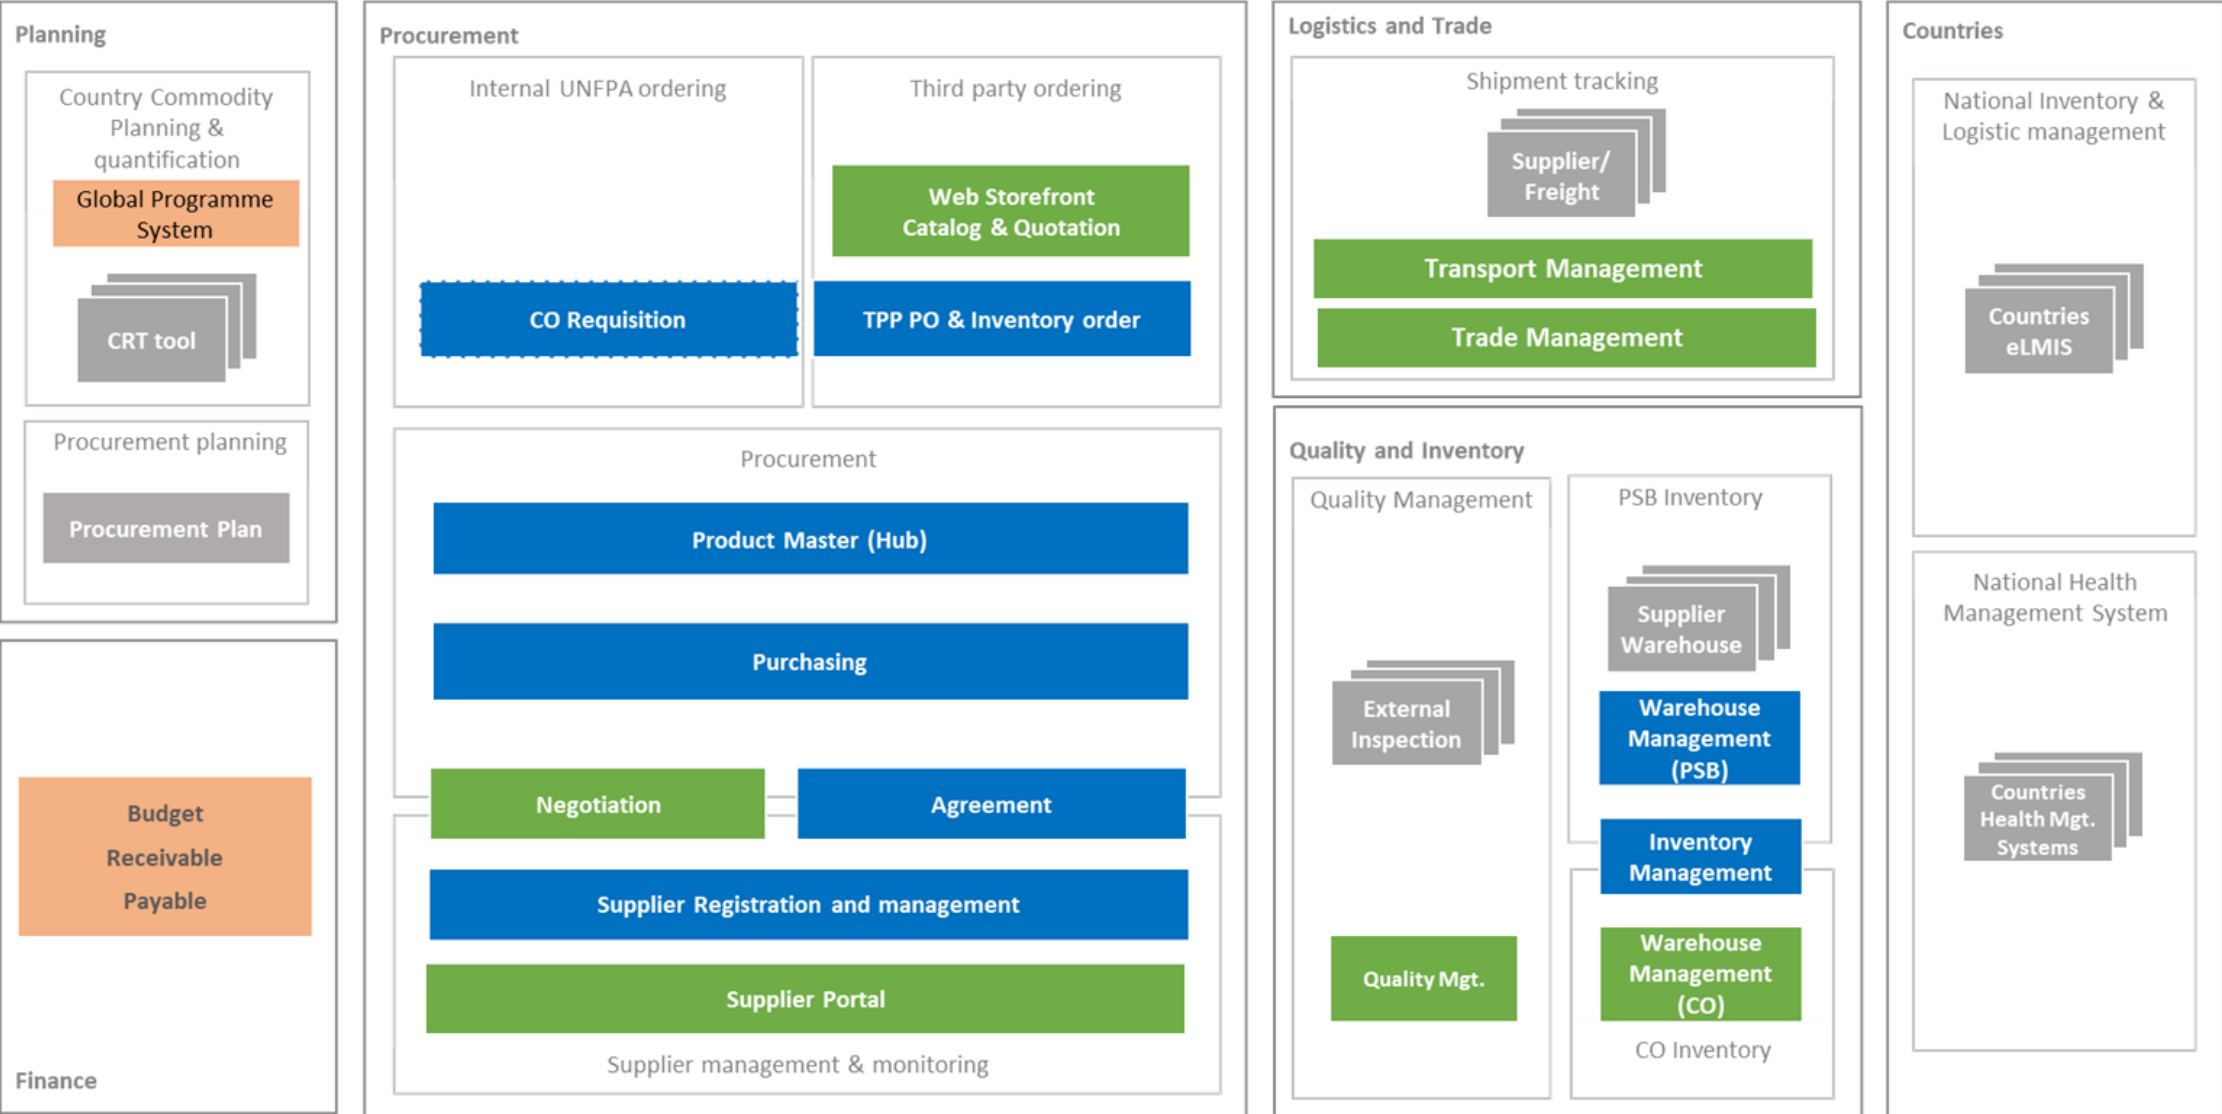

Online catalog to LTA's

Embedded Control framework

SCM ERP Landscape Overview

■ SCM modules

4. Rethinking Solutions for 2030

Sexual & Reproductive Health Industry
Consultation

4. Rethinking Solutions for 2030

Sexual & Reproductive Health Industry Consultation

3 Days & 3 Topics

Core Contraceptives & Life Saving Medicines

- SCM Opportunities

Upstream & Downstream

- Circular Economy for Climate Healthy SCM

Integration of Artificial intelligence in Times of Crisis

- Key role of data

Apply to attend as a guest from November 6th, 2023

Entrance is fully sponsored for all selected guests.

Space is limited and guests are responsible for any travel and accommodation expenses.

Call for Exhibitors & Speaker Abstracts open on November 6th, 2023.

RETHINKING SOLUTIONS FOR 2030
SEXUAL & REPRODUCTIVE HEALTH INDUSTRY CONSULTATION

Dates: May 21-23, 2024

Location: UN CITY

3 days of programming

Networking Events

Reception Dinner

Tradeshow

Exhibit
